Old Grimes.

Old Grimes is dead, that good old soul. We never shall see him any more. He used to wear an old white hat bent down behind, tipped up before. Old Grimes is dead, the old, old Grimes who lived upon the square. But who is this one, the son-of-a-bitch Grimes who takes the place of Chere? Old Grimes is dead, that good old soul. We never shall see him any more. But he has left a host of sons. With less than one hour's notice, Old Grimes had a lot of sons. And they had sons, their sons had sons. And they scattered far and wide. They all were harmless epistols. And yet his hope and pride. One landed in his village. And it's here the "rascals" dwell reside. Old Grimes is dead, Old Spire Grimes, the old inveterate joker. But our Grimes, the reformer? Grimes, Night after night plays poker.

—A farmer up in Madison county, Iowa, thinks he has found a sure preventive against the death of hogs by the so-called "cholera." He explains it thus: Between the front teeth and the grinders there is a space of two or three inches and in this space and under the gums of ever diseased hogs will be found a pocket of poisonous substance. To remove this, take a cold-chisel and hammer and cut this bottle of poison out. He says that previous to adopting this device he lost seventy-three hogs, but since adopting it he had not lost a single hog, and those of his neighbors who have tried the same operation report the same favorable results. As everything else has proved worthless, it certainly will not be very expensive to make the experiment.
